### 11<sup>th</sup> Prague Embedded Systems Workshop

# PESW 2023

June 29 – July 1, 2023, Horoměřice, Czech Republic

A forum for friendly discussion of emerging ideas  
aimed at doctoral and prospective doctoral students

#### BACKGROUND

The Prague Embedded Systems Workshop is an annual research meeting intended for the presentation and discussion of students' results and progress in all aspects of embedded systems design, testing, communications, and applications. It will be traditionally organized by the Department of Digital Design at the Faculty of Information Technology of the Czech Technical University in Prague. The workshop aims to enhance collaboration between different universities, not only inside the EU. It will be based on oral presentations, mutual communication, and discussions.

#### SCOPE

The PESW workshop addresses emerging issues, hot problems, new solution methods, and their hardware and software implementations in the fields of digital and mixed-signal system design. It is especially focused on dependable and low power design, and testing methods related to the SoC technology and modern embedded applications. The workshop topics include (but are not limited to):

- Programmable/re-configurable/adaptable architectures
- SoC and NoC design and testing
- Digital design optimization methods, logic synthesis and optimization
- Architectures and hardware for security applications
- On-line and off-line error detection and correction
- Fault-tolerant systems design methods, testability and reliability analysis
- Diagnosis & testing of embedded systems
- Verification of embedded systems
- Mission-critical & real-time systems
- Heterogeneous Cyber-Physical Systems, robotic control
- Artificial intelligence, machine learning, neural networks
- Applications of (embedded) digital systems

#### Special Session on Network Security:

- Network monitoring and measurements
- Network traffic processing and analysis, anomaly detection
- Security and privacy issues
- Security issues of Internet of Things

#### SUBMISSION TYPES

- **Full papers** (up to 10 pages, single-column) describing the student's original research. These papers will undergo a standard reviewing process and if accepted, they will be included in the proceedings with ISBN.
- **Abstracts** (up to four pages, single-column) of author's earlier published and successfully presented papers (at conferences, journals, etc.). These contributions will not be reviewed; emphasis will be put on the presentation and discussion. The abstracts will be included in the proceedings with ISBN.
- **Student posters** – abstracts of defended Bc. and MSc. Theses with subsequent poster presentation. These abstracts will not be included in the Proceedings.

#### SUBMISSION AND PRESENTATION

Prospective authors are encouraged to submit their contributions **before the submission deadline**. For details see the [PESW webpage](#).

Accepted full papers, abstracts, and student posters are supposed to be presented at PESW 2023 by the authors. Submitted abstracts will have longer presentations (20 min. presentation + 10 min. discussion).

The Proceedings will be distributed electronically and provided with ISBN. The list of papers and abstracts will be published at the PESW web page.
